

Drug discovery of Benzene-sulphonylurea and Thiourea Chemistry as antidiabetic agents in Saudi Arabia

Hassan H. A. Albar and Hassan M. Faidallah

Chem. Dept., King Abdulaziz University, POBOX 80203, Jeddah 21589,
Saudi Arabia, Email: halbar@kau.edu.sa Home page: Kau.edu.sa/halbar

In King Abdulaziz university laboratories, we prepared several benzene-sulphonylurea and thiourea derivatives. Chemical and antidiabetic test were done to some derivatives. The collecting data in our hands now, encourage our research strategy for continuation of the preclinical examination to these urea and thiourea derivatives.
